24/10/2024
By ON9CFG
ON9CFG@telenet.be

This coming weekend (October 26-27) sees one of the biggest DX contests of the year – CQWW SSB. Even if you’re not a contester, there’s usually something “juicy” to work on the bands, especially now sunspots and solar flux are much higher than last few years.

Keep an eye on **ADXO** for the most up to date listings of DX stations taking part, particularly a day or two before.

Meanwhile, here’s the **rules**. Also remember this year – **after a policy change** – Russia / Belarus stations are permitted to operate as normal.

DX NEWS

C21MM Nauru DXpedition –update

Nauru Media News – NTV recently interviewed C21MM team members DG2RON and DJ9KH who gave an insight into their DXpedition. You can watch the interview via [this link](#)

E6AQ Niue –update

Antenna for 40-10m bands installed. Log with first contacts available here. Poor propagation on the upper bands, reports Jacek. He also mentions that life on Niue flows slowly; Constitution Day is extended to a whole week, there is no possibility of taking care of even the simplest matters like buying food and finalizing a radio license. The same applies to the driving license, without a local permit Jacek would be driving illegally.

PX0FF Fernando de Noronha –now QRT

With almost 160K QSOs in the log, the PX0FF team are now QRT. This was an exceptional DXpedition and kudos to the team for a job very well done! Where next..?!

VP8G Falkland Islands –update by Gerben PG5M

Most of the equipment and materials have been packed. Important issue is to stay within the weight limitations of the airline. Still judging what to leave behind without compromising the setup and operation. Have also added some wires to create a 60m antenna. It was not possible to add one more fiberpole for a separate vertical, so will use the DX Commander as support for an L-shape 60m antenna. I have also built a Hexbeam, based on the K4KIO design dimensions. The start was the SP6CYN Hexbeam which is a very nice quality product. However, I wanted to have a version that is less in weight and can be assembled faster. With the support of Ham Radio Land (distributor for SP6CYN in the Netherlands), I started to discuss to create a DXpedition version. More on this later.

S9Z Sao Tome & Principe –update

New team members: We welcome two new members to the S9Z team, Carlos CT1END and Araujo CT1DVS have joined us as team expeditioners.

Sending equipment: Numerous obstacles have caused serious concerns in getting our equipment to the island. Our initial plans called for all the equipment to be transported by sea to the island, but we soon realized that this was not possible due to the lack of port capabilities there. We then attempted to send it by air freight using commercial and traditional passenger aircraft. However, we realized again that this would not be possible because international rules did not allow us to ship our equipment using these methods as well. This left one safe method and we will now be carrying all the equipment as checked luggage. <https://www.dx-world.net/s9z-sao-tome-principe/>

ZL7IO Chatham Islands –update October 22

It was an extremely windy day. At times it was hard to stay or walk outside. This was the first stress test for the DX Commander on the roof and it did not pass. The fiberglass pole broke and I have no antenna for 40/30m at the moment.

Since I had to work (for money) today we had little station building progress. In the afternoon the tower lugs not fitting got re-welded and painted. I also started to prepare the operating position for CQWW SSB (SOAB) and CW (M/2).

The 160 m vertical is still on the ground and we may have to use it for 40 m instead. In the contest I need 40 m much more. We'll see tomorrow if we can find something else to be used for 40 m. Whenever possible I run a station in FT8 on the side while working. I will disappear from time to time due to meetings.

VU4X Andaman Islands –update

Obtaining the necessary permits proved to be a very tough job indeed. It required no less than 18 months of patience, perseverance and extensive communication with the Indian authorities. Hereby, we would certainly like to thank ON8AZ Francis immensely for his perseverance. There were times when we wanted to throw in the towel for less, but we persevered and our hard work was rewarded, and we finally received the long-awaited positive news. Our thanks go to the Ministry of Communications and the Ministry of Foreign Affairs, who helped us get this permit finalised. <https://www.dx-adventure.com/en/vu4x-press-release-1/>
